

**Comments from Sevier Avenue Streetscapes Public Meeting**  
**December 10, 2015**

The basic plan is appealing; however, I do not care for the traffic circle project. I do appreciate the Sevier Avenue and area improvements.

---

I personally am very excited to see these improvements in our community. The results will be new investment in The Old Sevier Neighborhood and the South Waterfront especially.

---

A man in a wheelchair lives on Phillips. How will he access Phillips Avenue from his sidewalk if cars are parked in front of his house?

---

Work closely with property owners.

---

Wheelchair use on Phillips Avenue. I am concerned that parking along Phillips will block wheelchair access for residents. There are at least 3 residents on Phillips in wheelchairs. Please plan for open space for their access. I have some concerns about my own ability to get through the school traffic if the 600 block is one way. I would need to make a U-turn on Phillips.

---

We look forward to talking with you.

---

Please keep me updated on everything with the process and the meeting. Can you place me on the email list to generate info out to the community and owners? God bless your hands and journey!

---
